

Getting the Most of Your DNA Test

Friends of Irish Research

Richard Reid

So You Have Been Tested!

- The results are back and now is time to explore and see if any of your brick walls can be broken down.
- We will look at the results from your Ancestry.com DNA test
- Then we will look to see how we can enhance the results

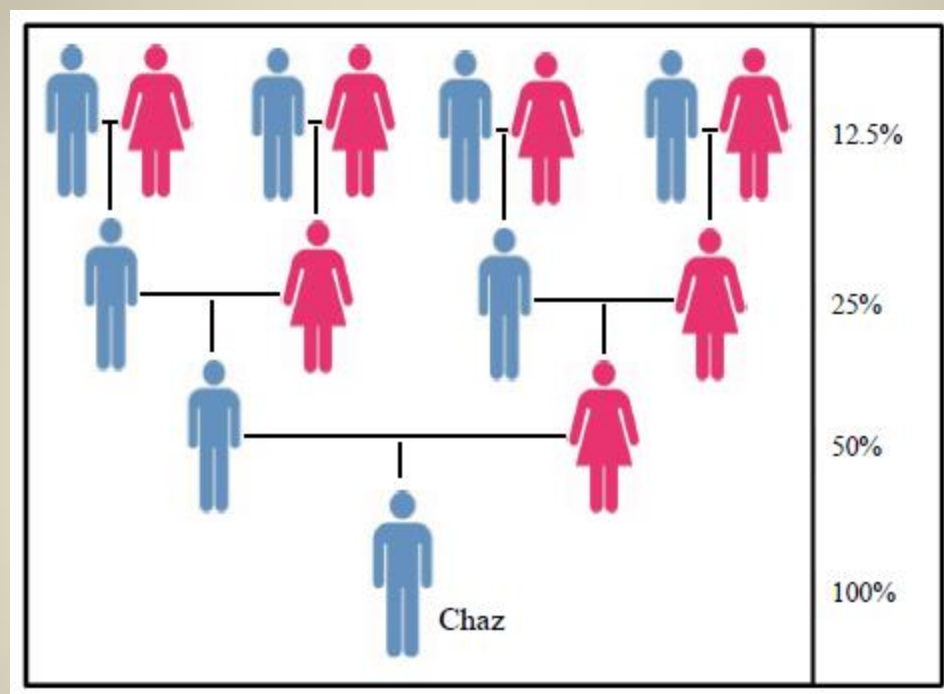

What is DNA?

DNA, or *deoxyribonucleic acid*, is a component of the cell (the basic unit of life) which carries the instructions for the development and operation of all living things. A piece of DNA is typically composed of two long intertwined molecules which are made up of smaller units called nucleotides. The two intertwined molecules interact to form a very long single structure called a *chromosome*. Chromosomes reside in the nucleus – or “control center” – of the cell. A typical human cell has *two copies* of each of 23 different chromosomes, for a total of 46 chromosomes. One set of each of the 23 chromosome pairs came from your father, and one set came from your mother.

What is Autosomal DNA?

In recent years, genetic genealogy testing has expanded into autosomal DNA testing, which includes a large survey of sites found across the remaining 22 pairs of chromosomes, known as autosomes. While the immediate benefit of autosomal DNA testing is the opportunity to recover genetic information useful to determine the ancestry of ALL our pedigree lines, regardless of gender, the abundance of data and the process of *recombination* (the shuffling and loss of DNA at each subsequent generation) of autosomal DNA has created new challenges in understanding and successfully applying genetic data to a genealogical context.

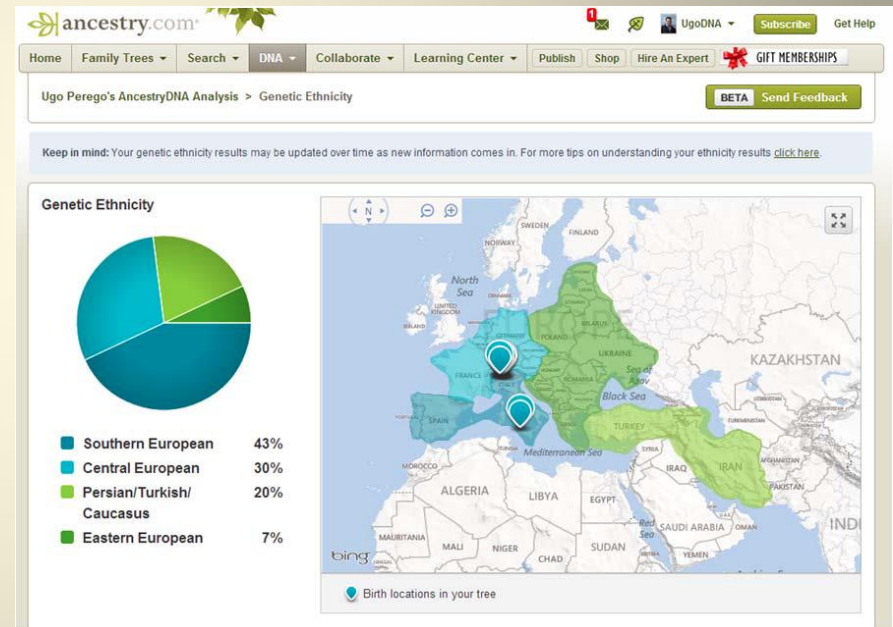

How Autosomal DNA Works

Chaz received about 50% of his DNA from each of his parents, about 25% of his DNA from each of his grandparents, and about 12.5% of his DNA from each of his great-grandparents. Although not shown in this figure, Chaz will inherit about 6.25% of his DNA from his great-great-grandparents, and so on.

Ancestry's Autosomal DNA Test

The autosomal DNA test by Ancestry.com has the great advantage and absolute potential of linking genetic data to the world largest repository of genealogical information. It is very promising for sorting through the complexities of autosomal DNA by proposing actual links to existing pedigree charts.

How Large is the Ancestry DNA Database?

AncestryDNA is the leader in DNA testing for family history and includes more than 2,000,000 people who have taken the AncestryDNA test as well as the ability to access Ancestry, the world's largest online family history resource, which includes millions of family trees and over 15 billion historical records.

Available Tests

		
1,500,000+ people tested	250,000+ people tested	2,000,000+ people tested
\$199 (Autosomal DNA, including low- resolution Y- DNA and mtDNA)	\$99 (Autosomal DNA) Other tests for Y-DNA and mtDNA	\$99 (Autosomal DNA)

Illustrating the Common Heritage

The screenshot displays the AncestryDNA Match Details page for a user named Gwen_Rudderham. The browser address bar shows the URL: dna.ancestry.com/tests/02D1AD35-540B-4A6F-8592-E7051B402871/match/04824C68-1ABF-45CF-BCAC-4EBFB0108763?filterBy=ALL&sortBy=RELA. The match is for a 3rd Cousin, Phillip Strickland, with a confidence level of "Extremely High". The predicted relationship is "3rd Cousins" with a possible range of "3rd - 4th cousins". The ethnicity of the match is listed as "Ireland, Great Britain, Europe West, Italy/Greece". The match's trace regions are "Iberian Peninsula, Scandinavia, Middle East, Europe East, Native American". The match's family tree is titled "Gwen_Rudderham's tree" and contains 3410 people. A "Shared Ancestor Hint" is displayed, indicating a shared ancestor, Phillip Strickland, 2nd Great-Grandfather. The hint shows a list of shared ancestors, including Emmanuel Strickland (Great-Grandfather), Maxwell Strickland (Grandfather), Rita Naomi Strickland (Mother), Richard Dwight Reid (Self), Emanuel Strickland (Great-Grand uncle), Asa George Strickland (1st Cousin (2x removed)), David William Strickland (2nd Cousin (1x removed)), and Gwen_Rudderham (3rd Cousin).

What is GEDMatch?

GEDmatch is a free, non-profit, “do-it-yourself” genomics website that allows DNA testers to upload raw data from FamilyTreeDNA, AncestryDNA, and 23andMe to compare with a large database of data that has been voluntarily uploaded by other testers.

GEDmatch Login

The screenshot shows a web browser window with the GEDmatch Login page. The browser's address bar displays the URL <https://www.gedmatch.com/login1.php>. The page header includes the GEDmatch logo and the text "Tools for DNA and Genealogy Research". A paragraph explains that GEDmatch provides DNA and genealogical analysis tools, with some premium tools available for users who contribute. It states that registration requires a name, email, and password, and provides a link to register. The "Log In" section contains two input fields: "Email Address" with the value "rreid@rdrconsulting.com" and "Password" with masked characters. A "Log in" button is positioned below these fields. At the bottom of the login section, there are three links: "Not Registered? Click [HERE](#)", "Forgot your password or wish to change your password? Click [HERE](#)", and "Site policy: Click [HERE](#)". The browser's taskbar at the bottom shows the Windows Start button, a search bar, and several application icons. The system clock in the bottom right corner indicates the time is 7:08 PM on 8/23/2016.

GEDmatch Tools for DNA and Genealogy Research

GEDmatch provides DNA and genealogical analysis tools for amateur and professional researchers and genealogists. Most tools are free, but we do provide some premium tools for users who wish to help support us with contributions. You will need to upload DNA and / or genealogical (GEDCOM) data to make use of the tools here. Registration requires your name, email and password. Click [HERE](#) to register.

Investigate

When it's finished loading you will have a long list of your DNA matches starting with your closest match. The estimated generations to a common ancestor are listed in the column "Gen" under "Autosomal". But please be aware that GEDmatch's algorithm in determining this is quite liberal. If you have a match at 4 generations, more than likely, it's 6 generations.

Contact Matches by Email

1 2 3 4 5 6 7 8 9 10 11

The screenshot displays the 'Family Finder - Chromosome Browser' interface. At the top, there's a navigation bar with links for 'Feedback', 'Refer Friends & Family', and 'Page Tour'. Below this, a 'Chromosome Browser Tutorial' button is visible. The main area is divided into two sections. On the left, there's a 'Compare List' section with a '5+ cM' filter and a 'Remove' button. Below this, a list of matches is shown, including '005-B012907-01/01,', 'Akins, Sheila Lorraine', 'Alford, David', and 'Allen, Everett'. On the right, there's a list of 11 matches, each represented by a horizontal bar with a small segment highlighted in grey. The interface is clean and modern, with a white background and blue accents.

My Origins

Upload GEDCOM for a Family Tree

The screenshot shows the myFTDNA website interface. The browser address bar displays the URL <https://www.familytreedna.com/my/family-tree#>. The page header includes a navigation bar with the following elements:

- Left navigation: Dashboard
- Right navigation: Richard Reid, Kit B86017

The main navigation bar contains the following tabs and buttons:

- DNA Matches
- Tree Map
- Family View
- Ancestry View** (selected)
- Show Generations (dropdown menu showing 4)
- Search a person or location (search bar)
- OFF Detailed View
- Share Tree
- Upload GEDCOM** (highlighted)
- Settings
- Need Help

The main content area features a circular profile picture placeholder with a blue "Family Finder" badge. Below the placeholder is the name "Richard Reid".

In the bottom right corner, there are two buttons: a "+" button and a "-" button.

Works Directly with FamilyTreeDNA and 23andMe, yet compatible with AncestryDNA Raw Data

The screenshot shows the MyHeritage website interface. At the top, there's a navigation bar with the MyHeritage logo and links for About us, Research, Apps, Community, and Support. Below this, there's a section titled "Get your FamilyTreeDNA test" with a sub-header "Data from the Family Finder test can later be uploaded to MyHeritage". Three test options are displayed in cards:

- Family Finder + mtFullSequence**: Find relatives across all lines, plus get the highest level mtDNA test. **Special offer** US \$288.00 **US \$248.00** [Order now]
- Y-DNA37 + Family Finder + Free mtDNAPlus** (NEW): Affordable combination for finding relatives across all your lines, with deep matches on your paternal and maternal lines. **Special offer** US \$307.00 **US \$248.00** [Order now]
- Y-DNA111** (NEW): The highest-resolution test available on the paternal line. Like the Y-DNA67 test, but deeper and more accurate, using 111 markers instead of 67. **Special offer** US \$359.00 **US \$299.00** [Order now]

Below the test cards is a section titled "Search for your family DNA project" with a search bar containing the text "Reid" and a magnifying glass icon. To the right of the search bar, there's a notification: "Good news! A DNA project is available for the Reid family! Click here to view the project. Projects create opportunities for people to work with others to explore their common genetic heritage."

At the bottom of the page, there are links for "FamilyTreeDNA FAQ" and "FamilyTreeDNA Privacy Policy" on the left, and "Show tests for females" on the right.

Donnachaidh Surname DNA Project

[< DNA tests](#)

Member Count: 1294

Surnames
Collier, Dobbins, Dobson, Donachie, Donaghy, Donnachie, Duncan, Duncanson, Dunken, Dunkin, Inches, McConachie, McConaghy, McConahay, McConahey, McConaughy, McConehy, McConnachie, McConnaughay, McConnaughey, Read, Reed, Reid, Roberson, Roberts, Robertson, Robinson, Roy, Stark

Description
Welcome to the Clan Donnachaidh DNA Project. This is the home site for DNA research into the surnames of Clan Donnachaidh. These Surnames include the following (and their many variant spellings) Robertson, Reid, Duncan, Donachie, Donnachie, McConnachie, Stark, Dobbins and 44 other are among the list of Clan Donnachaidh surnames. Donnachaidh (Donachad) translates from the Gaelic as 'Children of Duncan'. For the full history of Clan Donnachaidh visit us at our project website: www.clan donnachaidh dna.org Please understand that this is a collaborative research project. We require the active participation of each member to further this genealogical and genetic study of our surnames and their place in history. We are testing the Y-DNA of males with clan surnames to try and reconstruct the male lineages of clan families. There is not one single Y-DNA test to take but a series of DNA tests to continually dig deeper into our histories. All participants will be included in the ongoing studies and by joining the project; you are giving consent for your information to be anonymously included in ongoing genetic genealogy research. Your personal identity will not be revealed, but your results will be used to better understand the surnames of Clan Donnachaidh as a people and the history of our ancestors. PLEASE NOTE: The Donnachaidh DNA Project volunteer administrators have no commercial affiliation with any profit making organization and receive no compensation for services or expenses involved with the Donnachaidh Y-DNA project.

The Reid surname is associated with 4 DNA projects

Donnachaidh (1294 members)
