Sources: Document Your Family

- RootsMagic provides a powerful source list which lets you add, edit, delete, and print the sources of your information. Simply add the source once, then when you add a fact to a person and want to document where that information came from, you simply point to the source in the source list.

The screenshot shows the 'Edit Source' window in RootsMagic. The window has a title bar with the RootsMagic logo and standard window controls. Below the title bar is a tabbed interface with tabs for 'Citation', 'Master text', 'Detail text', 'Media', 'Quality', and 'Repository'. The 'Citation' tab is selected. The main area is divided into two panes. The left pane, titled 'Master Source', contains a form with the following fields: 'Original owner' (Phillip Smith), 'Dates' (1834-1849), 'Title' (Holy Bible), 'Edition' (King James Edition), 'Publish place' (London, England), 'Publisher' (Royal Press), 'Publish date' (1834), 'Year Owned' (1852), 'Owner' (Name of the present owner), 'Owner address' (Present owner's street address), 'City, State' (the city and state/province of the present owner's), 'Provenance' (who passed it down to who and details of ownership), and 'Analysis' (detailed analysis of handwriting, penmanship, time). The right pane contains 'Quality: (Unknown)', 'Footnote:' (Phillip Smith Family Bible Records, 1834-1849, Holy Bible King James Edition (London, England: Royal Press, 1834); privately held by . (access not insured) 1852.), 'Short Footnote:' (Phillip Smith, Family Bible Records.), and 'Bibliography:' (Smith, Philip. Family Bible Records, 1834-1849. Holy Bible King James Edition, London, England: Royal Press, 1834. Privately held by . (access not insured) 1852.). At the bottom of the window are 'OK' and 'Cancel' buttons.

Smart Merging

- RootsMagic provides the most powerful and easy to use merge capabilities available. RootsMagic will automatically look for duplicate individuals and display them in a list with the most likely matches listed first. Simply click a button to merge the duplicate pair, or mark them as "not a match" so that they won't show up in any future merge sessions. Plus, RootsMagic features SmartMerge technology to let you quickly merge all those "for certain" duplicates.

Beautiful Wall Charts

RootsMagic lets you create beautiful full color ancestor, descendant, and hourglass wall charts. You have full control over the positioning, size, colors, fonts, and other aspects of every object in the chart. With simple mouse control you can resize an individual's box, or drag it to another location on the canvas without breaking the family links. You can change colors of individual boxes, or change the font or color of the text in the boxes. You can even customize your chart by adding additional text, pictures, or shapes to the chart, and you can change the background image or color.

Shareable CD

- You've worked hard to collect and organize your family history, and now RootsMagic makes it easy to share that history with your family and friends. Your Shareable CD™ will feature a custom home page with your own title, photo, description, and contact information, and will include a read-only version of RootsMagic to show off your data and multimedia items.

RootsMagic[★]

Finally

- Since Ancestry's announcement that they were parting ways with their Family Tree Maker software, thousands of FTM users have found a new home in RootsMagic. One of the first questions they have is, "How do I get my data from FTM into RootsMagic?"
- Until today, the answer has always been through a GEDCOM file. But GEDCOM files from Family Tree Maker, while mostly effective, were often lacking data and details only found in the original file. Plus it added an extra step in the conversion process.
- That's why we're excited to announce today's release of RootsMagic 7.1. In addition to various tweaks and fixes, this update adds the ability to directly import any Family Tree Maker file.

New Reports Available

- On This Date and Obituary Report are new to version 10. On This Date lets you view the events in a selected family member's life based upon a selected date. For example, if you want to know how many living relatives your grandmother had the day she got married, you select your grandmother and the Reference Date and a complete list of your grandmother's living relatives that day is generated.
- The Obituary Report generates a written obituary as it might have appeared in the newspaper, using the information available for that person, including spouses, children, and other relatives. It's great for comparison to an actual obituary to see if you've missed anything (or if the obituary writer did!) and it also is useful for sharing with other researchers.
